Knockout Nutrition

Monster Amino 1.2kg

Price: \$85.00

To Build MONSTER Muscle You Need MONSTER Amino!

Monster Amino™ is an anabolic muscle fueling cocktail loaded with Branched Chain Amino Acids (BCAA's) and Monster Maize carbohydrates. Monster Amino helps to protect lean muscle during intense exercise and fuels muscle protein synthesis post-workout.*

BCAA's

Monster Amino is packed with the muscle sparing BCAA's L-Leucine, L-Isoleucine and L-Valine. CytoSport™ uses specialty micronized amino acids to maximize flavor and amino acid absorption. BCAA's help to protect lean muscle tissues during workouts and promote muscle recovery and growth post-workout.*

Essential Co-Factor

Monster Amino contains Pyridoxal-5-Phosphate an essential co-factor that facilitates transamination reactions. This cofactor helps to drive metabolic reactions necessary for BCAA utilization at the cellular level.

Packed With Complex Carbs

Monster Maize complex carbohydrates provide a unique blend of Amylopectin (waxy maize starch) and long chain glucose polymers (maltodextrin). The properties of these fast acting carbs allow for rapid muscle hydration and glycogen replenishment.

Ultra-Digestible

Monster Amino contains 100mg of Carbogen® to help accelerate digestion and breakdown of Monster Maize Complex Carbohydrates. Rapid digestion helps to protect and preserve valuable muscle glycogen.*

Monster Products are for the dedicated athlete determined to become a freak of nature! If you want to reach the next level in training and size, then you need monster nutrition and monster determination.
